

# Full Stack Development Test

## Section – A

1. What is the use of CSS?
2. Where can inline CSS be used?
3. What is the full form of HTML, CSS?
4. What is the difference between internal and external CSS?
5. What is the difference between a webpage and a website?

## Section – B

1. Make a traffic signal using HTML & CSS. (practically)
2. Recreate the google search page using HTML & CSS (practically)
3. Recreate the google account create page. (practically)

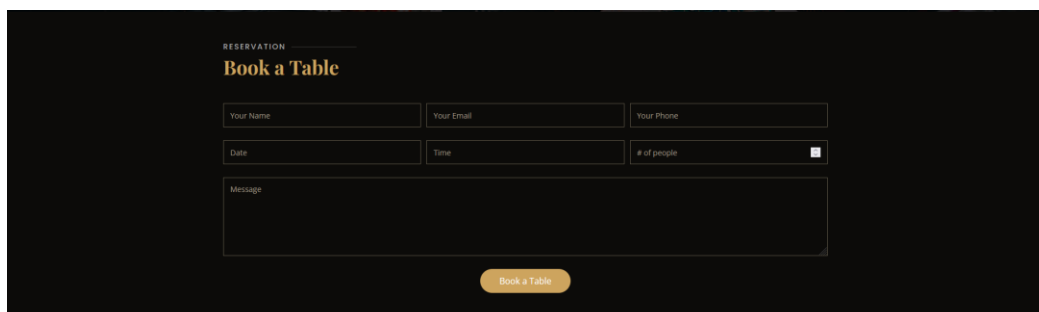

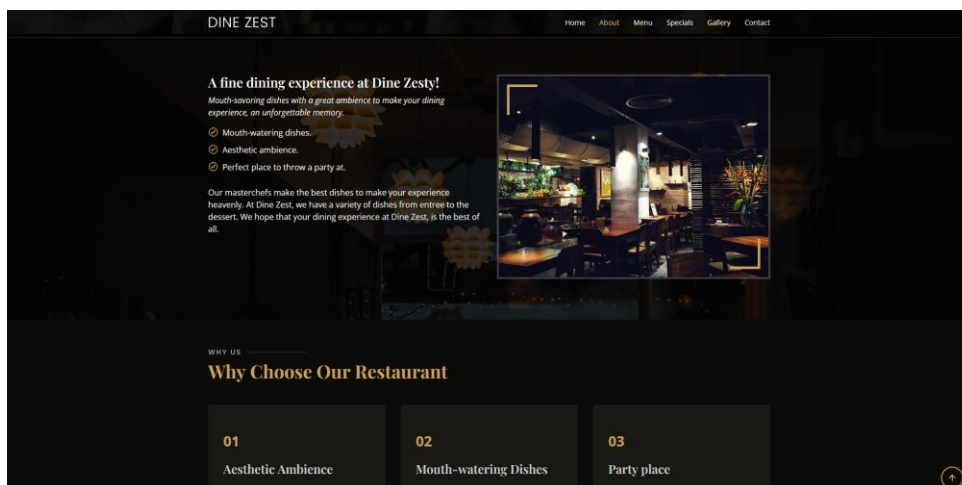

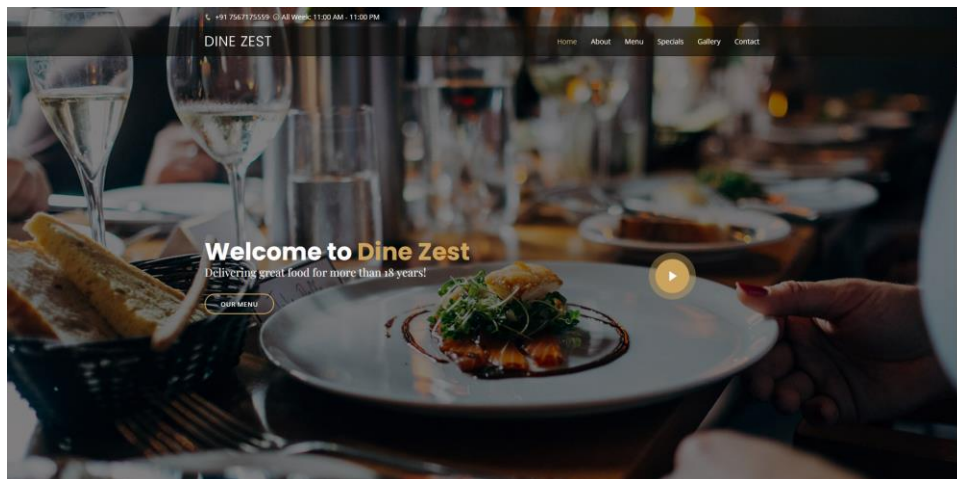

The image is a screenshot of the Google Account creation page. At the top left is the Google logo. Below it, the heading "Create your Google Account" is displayed. The form consists of several input fields: "First name", "Last name", "Username" (with "@gmail.com" as a placeholder), "Password", and "Confirm". There are also checkboxes for "Use my current email address instead" and "Show password". A blue "Next" button is at the bottom right of the form. To the right of the form is a graphic of a blue shield with a white person icon, and below it, the text "One account. All of Google working for you." At the bottom left, there is a language selector set to "English (United Kingdom)". At the bottom right, there are links for "Help", "Privacy", and "Terms".

(Image for reference)

## Section – C

1. Build a complete page of a restaurant where there the format should be like this.

(Here are a few reference images)
